# ZylGMaps Crack [Win/Mac]

[Download](#)

This component works with Delphi, C++ Builder and Visual Studio. It's your responsibility to install the component. This component is licensed as a Freeware, and it is

---

not necessary to pay any fees. This component is released under the terms of the GNU General Public License. It is freely available to everyone, so you can use it to create your own applications for free. If you are wondering if

---

this component is safe to use, check its source code. You are encouraged to use this component. If you use it in commercial projects, you are highly encouraged to advertise ZylSoft. This is the only way that we can receive

---

the support we need to keep improving our component. AMX Maps (formerly “Adobe Road Matching”) was originally designed to provide high-quality mapping features to designers who wanted the functionality of a

---

professional map editor within their app. Along the way, the project evolved into something far more powerful than that: a suite of tools that can be used to edit any type of image, including mobile applications, web pages, images and

---

other types of media.  
The most important features of AMX Maps are: ● The ability to import and export high-resolution images in any popular format, including but not limited to PNG, JPG, GIF and PDF. ● The ability to

---

load, save and edit  
vector-based shapes,  
including paths and  
polylines. ● The ability  
to read and write all  
popular OCR formats  
(OCR Text), including  
but not limited to TTF,  
PDF, ATC (Apple  
Pages Text), PPT,

---

PPTX and XLS. ●

Advanced drawing capabilities, including support for the most recent editable text styles and the ability to create, save and restore text in any OCR format.

● In-app creation of custom views,

---

combining the abilities of multiple components within a single application. ● A powerful selection system that can help you select and modify any areas of the map with the exact degree of selectivity that you

---

need. ● Export options for all popular formats and various sizes and resolutions. ● The ability to export and import the.mxd file format for use with Microsoft Windows-based applications. ● The ability to export as

---

a tile set for use with Google Maps. ● The ability to export any component to PDF, PNG, JPG or GIF. ● The ability to add various types of Google-based data layers to the map. ● The ability to save files

ZylGMaps Crack Free Download is a Google Maps component written in Delphi and C++ Builder. It allows developers to integrate Google Maps in their applications as a map

---

view, and it provides the necessary parameters for map navigation. The component has been designed to be easily implemented in applications written in Delphi and C++ Builder. Key features: • Drag & drop the

---

component on the form  
in which you want to  
add the map, •  
Configure the dialog's  
size to fit your needs, •  
Add the map view, •  
Choose a provider, •  
Configure all the  
parameters of the map,  
• Add/Remove

---

providers, •  
Add/Remove Layers, •  
Add/Remove controls, •  
Show and hide all the  
controls and controls, •  
You can also create your  
own controls using the  
custom properties, •  
Add/remove listeners, •  
Add/Remove event

---

handlers. ZylGMaps  
Features: The  
ZylGMaps component  
works with the Google  
maps and supports  
multiple providers and  
layers. It uses the  
Google Maps API to  
retrieve data from  
Google servers and it

---

provides all the required parameters to display a custom map on the form. ZylGMaps components: • ZylSoftGoogleMapView (view): it works with Google maps API, it supports multiple providers and multiple layers, the

---

component implements all the necessary interface and class to display Google maps. • ZylSoftGoogleMapView (controls): it provides the necessary controls to navigate and display map, it supports multiple providers and

---

multiple layers. • ZylSoft  
tMapView  
(button): it provides the  
necessary buttons to  
control the map. • ZylSoft  
ftMapView  
(image): it provides the  
necessary buttons to  
control the map view, it  
supports multiple

---

providers and multiple layers. Custom parameters: • ZylSoftGoogleMapView (Custom properties): it provides the necessary controls for customizing the map view, you can add custom properties to control the behavior of

---

the map view,  
depending on the type  
of custom property you  
choose, the map view  
will behave in different  
ways, like you can  
control the map labels,  
the map image, zoom,  
latitude and longitude,  
you can add your own

---

controls to customize the map view and customize the interface of the map view. • ZylS of `tMapView` (Custom controls): it provides the necessary controls for customizing the map view, it supports multiple

---

providers and multiple  
layers. Layers: • Zyl

Components for Delphi  
and C++ Builder -

ZylGMaps Introduction

Having a Google Maps  
view incorporated in

---

applications is quite handy, as it will enable users to easily search and find the required place / address.

ZylGMaps is an application that was designed in order to provide software developers with a way to

---

integrate Google Maps views in their applications, with all the required parameters for map navigation.

Deployed as a Delphi and C++ Builder component, the application comes packed with a set of

---

predefined example files and a basic documentation that will help novice users.

People will be able to initiate the utility by compiling it, after which it can be added to the libraries of either Delphi or C++ Builder.

---

Once the component has been appended to the preferred programming environment, it will appear in the component palette, as “Zyl Soft”. Being easy to handle thanks to dragging-and-dropping features, it will be easy

---

to adjust, by using the capabilities of the Object Inspector tool. Users are advised to use this component with the “Stop on Delphi exception” option deactivated, in order to avoid potential breaks in all handled exceptions.

---

The map layout that will result after enabling the component in the required applications will contain all the necessary features for browsing

**What's New In?**

---

ZylGMaps is a Delphi / C++ Builder component which integrates a Google Maps view into your application, allowing you to place markers and then navigate through your maps by specifying parameters such as

---

location, destination,  
route and speed.

ZylGMaps can be used  
with any application that  
can support standard  
TControl component.

The maps integration is  
achieved by the use of  
the Google Maps API  
and the

---

Delphi/C++Builder  
proprietary APIs. The  
maps parameters are  
easily handled, by using  
the Object Inspector. By  
default the map is  
configured to display  
the maps features  
(Google Maps, Satellite,  
Terrain, Street View,

---

Coordinates)
